Coupry, Gabriel.

A RELATION BETWEEN ATTENUATION IN SPACE  
AND ATTENUATION IN TIME. [1962] Sp.  
Order from SLA \$1.10      62-18782

Trans. of Acad[emie] des Sciences [Paris], Comptes  
Rendus (France) 1961, v. 253, no. 15, p. 1524-1528  
(pub. by Gauthier-Villars et Cie., Paris).

DESCRIPTORS: Structures, \*Elasticity, Mathematical  
analysis, \*Differential geometry, Attenuation.

The response is sought of an elastic structure which is  
slightly viscous and harmonically excited to the fre-  
quency of one of its nonattenuated modes on several  
points or in several zones of its boundary. The attenua-  
tion in space of each of the components of the forced  
vibration can be calculated from a knowledge of the  
attenuation in time of the free response of the structure  
when at least one of the space variables separates.
